What do you picture when you think of libraries? Rows of shelving laden with books? Quiet reading nooks? A severe looking librarian hushing you for the slightest sound? Today libraries like these exist only in Hollywood films.

The role of libraries has been changing over the years and have become a much more important community hub. Libraries focuses are less on books and more about gathering spaces, research and study space as well as community involvement.

As libraries have evolved into flexible spaces it only makes sense than that they have flexible furniture.

Tips for the Modern Day Library:

PRIVATE/ALONE

Individual spaces should accommodate focused work, user well-being and security of personal items.

- Provide enclosed spaces for visual privacy
- Support the need for focus and concentration by minimizing distractions
- temporary space ownership
- fill the need for short and long term use of space and privacy

PUBLIC/ALONE

Individuals want to work in the social company of others, provide a variety of open spaces.

- Support the needs for both social connection and focused work
- ergonomic support for short and long term use
- access to dedicated computer stations

PUBLIC/TOGETHER

Create space that are flexible for user who do group work in an open setting to stay socially connected to others. Adaptable gathering spaces to accommodate any event.

- create multi-purpose, flexible space to suite any function
- remove barriers between student and staff
- touchdown spaces for collaboration

PUBLIC/PRIVATE

Collaborative spaces should support different meeting modes and project teams. Classroom settings should support active learning, computing and distance learning with simple transitions.

- accommodate multiple meeting modes
- flexible, customizable space to meet the needs of collaboration, privacy and ergonomics
- support a variety of activities

When designing or retrofitting library spaces, consider the entire space and keep adjacencies at the forefront. Each area should be supported both independently and as a whole to maintain the flow of the whole space. Recognize the need for both acoustic and visual privacy.

Private/Alone

Space dedicated for the individual user; to support a variety of focused work including: study, research, projects, etc. Consider support for secure personal storage and a variety of work tools for both short and long term use.

Public/Alone

Open setting for independent work in the social company of others. Support focused work in an open space. Offer flexible and ergonomic solutions for short and long term use.

Public/Together

Create high adaptable gathering spaces for multipurpose functions. Support touchdown meetings and collaborative activities between teachers and students.

Private/Together

The modern day library should accommodate a variety of uses such as active learning, computing and distance learning. Support various meeting type for large and small groups.

FUSED

Despite the emphasis on collaboration and group work, the need for focused independent work stations is still prevalent. The FUSED blocks distractions and the height adjustable work surface will keep people moving during short or long study. Add acrylic panel extenders for additional protection while maintaining sight-lines within the space - panel extenders also available in ezoBord for acoustic privacy.

FORESIGHT

Many prefer to work alone, in the social company of others. The FORESIGHT can take on different configurations, including a classroom settings. The station creates individual work space while still being able to see and communicate with others. Optional task lights allows users to have some level of control of their own space. Create private individual workspace or test taking stations with sound absorbing privacy panels.

RENDEZVOUS

Create space for users to spread out and work together, the Rendezvous provides privacy and can be equipped with monitors to aid in collaboration. Soft seating provides comfort for long study sessions. Easily reconfigure into one large meeting booth or a more intimate meeting space.

DOS

A flexible space for social breaks, group touchdown and individual study. With the back drop down wall this 2 seater booth becomes a space for larger groups, add the optional pull-out work surface to add a third person. Soft seating provides comfort for long study sessions. The back wall can also be set up as a table allowing for 2 more users/ station or, have a "booth" for 8 - 10 people when stations are pushed together.

SHAPE

Ergonomic stations for short and long term compute work. Easily transition from sit to stand with height adjustable comfort. Create visual and acoustic privacy with acoustic privacy panels. Flip top surfaces in whiteboard finish can be used in lectures and class settings.

SHIFT

A clean, minimal station with plenty of workspace for any kind of project. Panel walls create visual privacy while still having social proximity to others. Add acrylic panel extenders for additional protection while maintaining sight-lines within the space - panel extenders also available in ezoBord for acoustic privacy.

FLIP

Quickly transition from focused independent study, to collaborative work with the simple flip of a station. Study carrel is equipped with acoustic panels to create a truly focused station. Flip down the station for ample workspace for group projects.

UNIFY

A simple solution for group projects or tutor sessions. Break down the barriers between student and teacher with this collaborative solution. Tables can be reconfigured to suit any occasion.

Features and Benefits

- Stations are shipped on 650 lbs ball-bearing casters which can traverse almost any surface including asphalt and easily rolls over floor transitions
- Engineered to be set up and taken down multiple times without degradation to parts and pieces
- For lectures, guest speakers, author signings and more - reconfigure your space in minutes with stations that can fold to 15% of their size and rolled into storage space
- Add additional privacy and security to stations with privacy panels in either acrylic or sound absorbing ezoBord
- Mobile walls can also be used to separate spaces and stations while also doubling as a writable surface with whiteboard panels
- All surfaces can be easily wiped down with Lysol or soap and water as many times a day as necessary without degradation to material
