Introduction

Humans are adaptable but, COVID-19 has put that adaptability to the test. We've had to change the way we visit our family and friends, how we shop and how we work. With all this change, we've reestablished our priorities.

The way we work has changed drastically. Many workplaces have transitioned to working from home, some even making this change permanent. While other offices attempt to create safer work spaces by turning away from collaborative and hoteling workspace and instead picking private individual stations.

This document provides Swiftspace solutions for Healthcare, Offices, Schools & Libraries and Hotels. Whether buying new or retrofitting an existing space, Swiftspace has solutions to provide protection and safety for any space

What sets us apart?

Intelligent business decisions are not based on a quick glance, so one is encouraged to compare Swiftspace lines to competing desking and benching systems. The differences are astounding and speak in favour of these Swiftspace solutions:

- **Swiftspace Stations** are engineered to be set-up and taken down hundreds of times, without the loss of functionality. This process can be completed by anyone without tools, eliminating the need for a professional installer.
- **Swiftspace Stations** are on castors making them mobile. In other words a complete office layout can be achieved in minutes. Build it, move it, take it down or put it away with minimal fuss. If desired castor covers are available to hide castors.
- **Swiftspace Stations** come completely assembled with all of the necessary parts already attached to the workstation.
- **Swiftspace Stations** fold up in seconds. With this process complete, many Swiftspace Stations can be folded to save 75-85% of their previous cubic size, which means storage is a breeze.
- **Swiftspace Stations** are made to be both functional and cost effective. Comparably priced to other desking and benching systems, they require no additional set-up configuring expense.

How are we the same?

While the differences seen in Swiftspace systems are what makes them a better fit for modern office spaces, their look, feel and statement of line make them comparable to other systems. It's permanent furniture with the ability to change - not in 5 hours but, in 5 minutes. These features include:

- Different lengths and widths of worksurfaces
- Different wall heights and lengths
- Minimalistic support structure
- Centre and side storage components
- Multiple privacy solutions
- Mobile storage solutions
- Power/data solutions
- Lighting solutions
- Adjustable height solutions

Healthcare

Swiftspace has solutions for triage, waiting rooms, temporary treatment space, nurse stations and more. One of the most important aspects in healthcare is cleaning, which has become even more strict. All of our solutions can be cleaned multiple times a day without degradation to the finish. There is also the option for anti-microbial spray.

All of our stations are mobile, which means not only can stations be pulled away from walls to clean, they can also be reconfigured quickly.

Education

Classrooms and libraries benefit from our mobility when it comes to reconfiguring spaces for social distancing regulations, classroom sizes, or presentations/events. Our privacy solutions are another option to retrofit a space instead of buying new. Our Mobile Walls and Privacy Panels are a great way to create separation and safety quickly.

Of course, all our solutions can be wiped clean and have the option for anti-microbial coating.

Offices

Office spaces have had to transition away from collaborative and touchdown space and move towards private, individual workstations.

Swiftspace is the only manufacturer who has many different versions and heights of privacy options that are fully integrated into their DNA.

Mobile Walls, Privacy Panels, Panel Extenders and stations with built in walls, there are plenty of options to create a safe and private workspace that can be reconfigured in minutes!

Home Office solutions also available, click [here](#)

Hotels

Hotels have seen the biggest change as travel has been restricted and vacations and events cancelled. However, people working from home are looking for a change of scenery and booking long term stays. For a few weeks or even month, they'll rent a room to work/live. Hotels could also transform guest suites into rentable office/film space.

With Swiftspace, hotels can transform a room in minutes with our mobile and flexible solutions. If a room needs to be turned back into a guest suite, our stations fold to 15% of their size and can be rolled into storage.
