

Effortlessly transition between spaces and activities with Swiftspace Ensemble

In today's modern office, the workforce is demanding adaptability to accommodate the ever-changing needs of the hybrid work model. This requires flexibility that strikes a balance between individual-focused and collaborative work styles. This served as the foundation for the creation of the Ensemble line - a design that prioritizes human needs, simplicity, and value.

Swiftspace Ensemble provides a bespoke product that can quickly adapt and customize to the specific needs of individuals and organizations. With the same set of stations, users can assemble a tailored combination of Ensembles that suit their distinct purposes and workspace needs.

Versatility to Mix & Match

The Swiftspace Ensemble provides options that cater to the diverse needs of the individual. With adjustable shelving, hooks, storage troughs and privacy panels, users can customize their space according to their personal preference, creating the Ensemble they desire.

Create Your Unique Work Style

Swiftspace's Ensemble is designed to revolutionize team spaces in modern workplaces. With swift customization and mobility features, it allows for an agile workspace that can quickly expand, contract, reconfigure and relocate as needed.

Dynamic Design for Dynamic Offices

Swiftspace offers personalized assistance to help create custom Ensemble stations before they are shipped. Swiftspace provides options such as monitor carts, office carts, and open desking to give offices the freedom to design stations that meet the unique needs of their team. Once the station arrives, additional accessories are available for further customization.

Collaboration Anywhere, Anytime

Ensemble is a mobile solution that allows offices to seamlessly create team collaboration spaces. Ensemble supports hybrid work models where both virtual and in-person team members can work together efficiently. Using these stations, teams can create, transport, and share their work easily. Additional worksurfaces are available to enhance communication and collaboration.

Design on the Go

The Swiftspace Ensemble enables numerous work modes by providing workstations that can flex as work varies throughout the day, from collaboration, to social gatherings, to solo focused work, Swiftspace Ensemble meets the demands of the team while keeping the individual in mind.
